Objective Statement

Self-taught programmer with a passion for web development, design, and security. Committed to creating secure and user-friendly websites that deliver exceptional user experiences.

Work Experience:

Cashier | August 2023 - Present

- Facilitated smooth and efficient customer order processing, ensuring accurate order entry into the system.
- Collaborated closely with the kitchen team to relay orders, manage special requests, and ensure precise order preparation.
- Utilized strong teamwork and communication skills to coordinate with colleagues and deliver orders promptly.
- Skills used: Customer Service, Cash Handling, Order Management, Communication, Problem-Solving.

Certifications:

- **CompTIA A+ (In Progress):** Completed extensive learning modules including hardware, OS, software troubleshooting, security, and operational procedures.
- **Google Cyber Security Professional Certificate:** In this 8 part course in networking, response, linux, sql. Python, Threats, Risk management. I have good understanding on how these work with hands on training too.

Education:

- **A-level | St Helens College, 2023-2025:** (In progress)
 - BTEC Level 3 Extended Diploma | Information Technology (Projected Graduation: 2025).
- **GCSE | Cowley International College, 2018-2023:**
 - GCSE | Maths | Grade 5 | B.
 - GCSE | English | Grade 5 | B.
 - GCSE | Science | Grade 5-5 | B-B.
 - GCSE | History | Grade 5 | B.
- **BTEC | Cowley International College, 2018-2023:**
 - BTEC | Construction | Level 2 Merit | B.
 - BTEC | Animal Management | Level 2 Merit | B.
 - BTEC | Information Technology | Level 2 Distinction | A.
 - BTEC | Engineering | Level 2 Merit | B.

Projects and Achievements:

Banking Website with Anti-fraud Feature

- Developed a secure banking website with anti-fraud functionality that reduced fraud incidents by over 90%, based on research with 50 individuals.
- Implemented robust user authentication and employed JSON database for efficient data management.

IT Ticket Tooling Website

- Designed and built an IT ticketing platform that improved efficiency and response times by streamlining ticket submission and management.
- Utilized a JSON database for seamless ticket management.

Moderation Projects

Description: These Groups of projects I have created is supposed to make site moderation easier the moderation training system is also used to help new moderation staff.

Moderation Warning Count Project:

Description: Created a system allowing users to view their warnings and understand their proximity to potential bans, warnings, or suspensions. Accomplishments: This system gives users transparency in their account actions and how close they are to be terminated from the site. Its bold colour scheme makes it easy for any demographic to understand.

Moderation Training System:

Description: Designed and implemented a flagship moderation testing system utilizing heavy JavaScript without backend support. This system effectively trained moderators to identify preset messages. Accomplishments: One of my favorite projects as this is a good starting point for companies to use the software in order to train their moderation teams. During this project there was a few hiccups with score counting but I was able to overcome this.

Portfolio Website

- Designed and developed a personal portfolio website, attracting 361 unique visitors and 1006 total requests in a 30-day period according to Cloudflare statistics.
- Created captivating advertisements, logos, and posters for various projects.
- Leveraged Git for efficient version control and streamlined website deployment processes, ensuring seamless project management and collaboration.

Industry Networking

- Established connections with 100+ professionals in the field through active communication, contributing to valuable learning experiences.

Skills:

Technical Skills:

- **HTML, CSS, Python, JavaScript, SQL, React, Website Design, IT support, Computer/Software Repairing.**

Soft Skills:

- **Self-Motivated:** Took the initiative to learn web development, design, and security concepts on my own, leading to the creation of projects like the secure banking website with anti-fraud features.
- **Adaptability:** Eager to learn and stay updated with new technologies.
- **Good Communicator:** Developed strong communication skills through personal achievements and networking efforts.
- **Creative:** Developed eye-catching visuals that attracted 361 unique visitors in a 30-day period, according to Cloudflare statistics.
- **Critical Thinker:** Completion of extensive learning modules for the CompTIA A+ certification demonstrates capacity for critical thinking and analytical problem-solving.
- **Good Teacher:** Effectively communicates complex subjects across a wide variety of demographics.
- **Customer Service:** Experienced in customer service, ensuring accurate order processing and effective communication for exceptional experiences.
